

INTERNAL HYBRID TRAINING CONFERENCE

Attendee Stats

In-Person: 247 | Virtual: 640 | Attended Both: 135

VIRTUAL OPTION FOR ATTENDEES

By offering a virtual option for attendees, an estimated total of 140,800 kg CO₂e was avoided compared to in-person attendance.

This savings is equivalent to the emissions generated from a standard fossil-fuel automobile driven 22,000 miles, which is approximately one trip around the Earth at its equator!

UN GLOBAL GOALS ACHIEVED

By providing a virtual option for attendees, several UN Sustainable Development Goals were achieved including:

- #3 - Good Health and Well-Being
- #4 - Quality Education
- #10 - Reduced Inequalities.

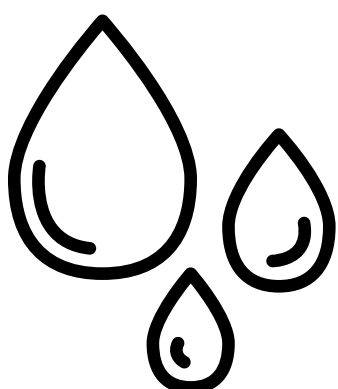

RECYCLING

It is estimated that event recycling saved an approximately 1,156kg of waste from reaching local landfills.

This is roughly equivalent to the weight of 8 baby elephants.

PRINTED PROGRAM ELIMINATED

By eliminating printed programs for event attendees, it is estimated that 45,113 liters of water was saved up-stream.

This volume is equivalent to about 150 bathtubs filled.
