

11TH
**NORTHWEST
 CLIMATE
 CONFERENCE**

By meeting virtually instead of face-to-face, this three-day conference achieved the following estimated emissions savings compared to its 2018 in-person event in Boise, Idaho.

23 HOURS TOTAL CONFERENCE TIME

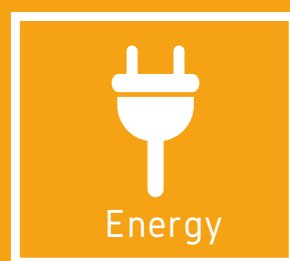

TOTAL EMISSIONS

IN PERSON

Total In Person CO₂e Emissions: 54,247 KG

VIRTUAL

Total Virtual CO₂e Emissions: 2,201 KG

TOTAL CO₂e SAVINGS 52,046 KG CO₂e

That is equivalent to eliminating the greenhouse gas emissions from an average passenger vehicle traveling 134,109 miles.

THE HIDDEN WORKFORCE

"I'm a rural Washingtonian working to create positive climate, social, and economic outcomes through government and nonprofits. It can be a challenge to access new ideas and make new connections from a rural area, given the long distances and emissions traveling for a conference demands, and especially in the time of COVID with additional family and health concerns. I am thrilled to attend the NW Climate Conference this year virtually, to make connections, learn from peers across the region, and apply what I've learned to our regional Climate Action Plan so we can lead the way to equitable climate adaptation outcomes."

SARAH BROWN

UN GLOBAL GOALS

By meeting virtually the event incorporated 8 SDGs.
